SUMMARY

Senior Front-End Developer with 5 years of experience in building scalable and high-performance web applications. Specializes in React.js, TypeScript, and modern UI/UX design. Proven ability to lead development initiatives, architect component libraries, and optimize application performance, resulting in significant reductions in load times and user drop-off rates. Experienced in developing complex, data-driven dashboards for the financial and AI sectors.

PROFESSIONAL EXPERIENCE

Senior Front End Engineer | Procix Software Private Limited | June 2025 – Present
Developing developer tools and services in the artificial intelligence space.

- Lead the front-end architecture for enterprise-level AI developer tools using React.js and TypeScript, adhering to micro-frontend principles for improved scalability and team autonomy.
- Architect and implement a reusable UI component library to standardize development and accelerate feature delivery by 25%.
- Optimize application performance through code-splitting and lazy loading, targeting a 15% reduction in initial page load time.
- Mentor junior developers and establish coding standards and review processes to elevate team code quality and productivity.
- Design and develop reusable component libraries and design systems, ensuring consistency across multiple products and reducing development time by 25%.

Front End Engineer | Sapper Software | April 2023 – May 2025

- Spearheaded the development of a new onboarding schema using React.js and TypeScript, resulting in a 15% reduction in user drop-off rates.
- Architected and implemented a custom UI component library, improving development efficiency by 20%. Optimized front-end performance, reducing page load time by 10% through code refactoring and lazy loading techniques.
- Developed dynamic, data-driven dashboards for a wealth management platform (Wealth UI), enabling users to visualize and analyze their portfolios effectively.
- Created interactive tables and data grids for a financial analytics platform (Spreading UI), empowering users to manipulate and interpret large datasets with ease.
- Integrate advanced data visualization libraries (D3.js, Chart.js) for complex financial dashboards, enabling real-time analytics and improved decision-making capabilities.

Front End Engineer | YARS Private Limited | August 2021 – February 2023

- Led the redesign of the company website, resulting in a 25% increase in website traffic and improved user engagement.
- Developed and maintained responsive web applications using Angular, Ionic, and JavaScript, ensuring seamless user experiences across devices.
- Implemented A/B testing strategies to optimize website conversion rates.

SKILLS

React JS, Redux, TypeScript, JavaScript, Node JS, Postman API, Angular JS, Bootstrap, User Interface Design, Front End Optimization, UI Component Design, HTML, CSS

EDUCATION

Dr. APJ Abdul Kalam University | May 2015 – April 2019

Bachelor of Technology in Electronics and Communication Engineering | Aggregate score: 75.8%

Secretary at Forum of Electronics Engineer
